Continuation of Substance of Interview including description of the general nature of what was discussed:

The examiner suggested changing "a filler selected from the group consisting of oxides, hydroxides and carbonates containing a Group II element" to --a filler selected from the group consisting of oxides, hydroxides and carbonates, each containing a Group II element--. Paragraphs 0048-0051 of the corresponding pre-publication clearly support the notion that the required oxide/hydroxide/carbonate contains a Group II element. Applicant notes that the use of these fillers increases the strength of adhesiveness (see paragraph 0048). Mr. Bauman agreed to change the claims as suggested.

Mr. Bauman also agreed to the following changes:

- a) inserting the word --curable-- after "cationically" in the preamble of claim 1.
- b) deleting "(C)" in claims 11-13.
